

An invitation for the rehabilitation community
to the 'Woodstock' of neuroscience...

noi 2012!

Neurodynamics & the
Neuromatrix Conference
Adelaide, Australia, April 26-28
www.noi2012.com

Pain and stress are massive problems – not only financially for us all but what they do to work, family life, creativity and productivity. Let's do something about it and try to close the knowledge gap which has opened up as the neuroscience revolution races away from standard clinical practice.

The road to the Neurodynamics and the Neuromatrix conference at the Adelaide Convention Centre 26-28 April 2012 is now open. NOI 2012 brings neuroscience revolutionaries from around the world to the beautiful city of Adelaide for three days of essential information download in a unique opportunity for health practitioners.

We'll have the juicy new neurosciences – plasticity, mirror neurones, pain and stress literacy, neuroscience-backed psychology, neuroimmunology, neurodynamics and movement/brain sciences from the world's best. *Try thinking of it more as a festival than a conference!*

But we'll go much deeper to fulfil the conference aim of moving pain and stress management into the realm of neuroscience-backed biopsychosocial practice, for example – what about spirituality and pain, how lateral can we go with new plasticity based therapies, how can you use words to treat, what about education and movements as antigens, where does pharmacology fit in when we know there is a drug cabinet in the brain as potent as anything man-made?

This conference is chock-a-block with intellectual nourishment. Even the lunchtimes are packed with art, meditation, neuroscience updates, dance, and learning about social media applications for healthcare and research, not to mention the parties!

www.noi2012.com

NOI 2012 is organised by NOI Australasia | www.noigroup.com
Sponsored by local insurance groups and The University of South Australia
NOI supports investment into professional research.

Some **workshops** that will tickle your delights:

- Cooking to show real pacing and nutritional skills
- Neurodynamics and the plasticity of therapeutic Latin dance
- Manual skills to examine nerves
- Fool yourself and understand plasticity in the Illusions Room
- Using mirrors and laterality reconstruction for pain
- Deep discussions probing the neuroscience of return to work
- From science to bedside for nerve entrapments
- The neuroscience of food and wine tasting

and more!

"Brilliant! I didn't stop for three days. This should change the way conferences are run."

Ryan, Physio, Birmingham, NOI 2010

TICKETS

Early bird tickets available until 31 July 2011

Lazy bird tickets available from 1 August 2011

All tickets include welcome reception, conference dinner and the opportunity to be involved in extra-curricular activities with keynote speakers and their nerdy passions.
